Please support ACTA for the good of Europe

Dear Member of the European Parliament,

Over the past two weeks, we have seen coordinated attacks on democratic institutions such as the European Parliament and national governments over ACTA. The signatories to this letter and their members stand against such attempts to silence the democratic process. Instead, we call for a calm and reasoned assessment of the facts rather than the misinformation circulating. A considered reaction is more important than ever at a time when many outside of Europe doubt the ability of the European Union institutions and its Member State governments to act together.

The signatories of this letter represent thousands of European companies of all sizes and millions of workers in dozens of sectors crucial to the European economy, which are eager to get Europe out of the current economic crisis by promoting innovation and growth-enhancing measures. We are all dependent on intellectual property.

ACTA is good for Europe. Without changing EU law, it establishes common procedures for dealing with IPR infringements across countries accounting for 50% of world trade. The framework set up by ACTA will have a positive impact on protecting Europe’s industries, jobs and people. ACTA will have no negative consequences as it does not depart from EU law – as confirmed by three opinions of the European Parliament’s Legal Service as well as the European Commission. It is important to show that Europe is united and has trust in its institutions and government processes. That is why ACTA is supported by all the organisations and companies below, as well as 22 European Member States who joined the EU in the first step towards ratification.

We therefore urge you to focus on the facts and not the misinformation and to support ACTA. ACTA is an international cooperation project that will protect Europe’s rights and people and will confirm the EU’s global importance as a responsible trading partner. For Europe to have a successful knowledge economy and manufacturing base it must protect its workers, creators and the innovations of its manufacturers and industries abroad. The ACTA treaty sends an important message to third countries and to Europe’s workforce that our rights must be protected in practice, and that Europe will not fall behind other countries in this regard. This is a crucial moment for Europe’s governments and institutions in their effort to safeguard Europe’s jobs and economic future. Failure to do so will irrevocably affect Europe’s credibility as a trusted global trade partner.

We thank you for your support on this crucial issue:
