<td>Site Description</td>
<td>SoundCloud is (according to own description) “the world’s largest music and audio platform”. Its users can share, listen to, and comment on originally created audio content, including music and podcasts. SoundCloud’s users upload content with a distinctive URL, enabling it to be linked from anywhere to better facilitate audience outreach. Registered users may listen to an unlimited amount of content and upload up to 180 minutes of audio free of charge. For a fee, users may subscribe to SoundCloud Pro or Pro Unlimited, which enable users to better track listener statistics, upload more content, and tailor online advertising. End-content users may also subscribe to SoundCloud Go, which functions like traditional music streaming services but incorporates user-uploaded content and allows for ad-free offline listening. Content creators may adjust which and of their tracks they want behind SoundCloud Go’s paywall on a song-by-song basis.</td>
