

What Is INTA?

The **International Trademark Association (INTA)** is a global association of brand owners and professionals dedicated to supporting trademarks and complementary intellectual property (IP) to foster consumer trust, economic growth, and innovation, and committed to building a better society through brands.

- **Membership:** INTA's members are nearly 6,500 organizations from 185 countries. INTA's member organizations represent 34,350 trademark professionals and include brand owners from major corporations as well as small and medium-sized enterprises, law firms, and nonprofits. There are also government agency members as well as individual professor and student members. Except for a few limited categories, INTA membership is not by individual but by organization. Every employee at a member organization's location can take advantage of member benefits and volunteer for a committee, project team, or other service opportunity.
- **Global presence:** INTA undertakes advocacy work throughout the world and offers educational programs and informational resources of global interest. The Association has headquarters in New York City; offices in Beijing, Brussels, Santiago, Singapore, and Washington, D.C.; and a representative in New Delhi. As a not-for-profit association, INTA's role is to serve its members and society as a trusted and influential advocate for the economic and social value of brands.
- **Policy priorities:** INTA's major policy priorities focus on areas of global concern, including:
 - **The value of trademarks and brands**—informing government officials and consumers about the value of trademarks and brands to local economies and society at large
 - **Harmonization**—advocating for harmonization of laws and regulations across jurisdictions, resulting in less uncertainty and confusion as well as greater cross-border protection for consumers
 - **Brand restrictions**—encouraging governments to take a balanced approach and consider the bigger public policy picture, and to ensure the integrity of their IP systems as a means to promote investment and economic growth
 - **Counterfeiting**—working in partnership with all stakeholders to advocate for stronger anticounterfeiting measures online and offline, to promote cooperation in enforcement efforts across agencies and borders, and to increase awareness of the harms of counterfeiting
 - **Internet Governance and the Domain Name System**—playing a prominent role in ensuring a secure, stable, and trusted Internet in order to protect consumers and trademark owners

2022-2025 Strategic Plan
